## ABOUT ME

A highly motivated and aspiring full-stack developer, passionate about writing code and debugging complex errors.

During my previous role as a sales and marketing analyst, I discovered a passion for the technical aspects, specifically in debugging errors and comprehending code while utilizing macros with the developer tab option.

During my maternity leave, I seized the opportunity to embark on a transformative 16-week journey at the School of Code, a rigorous boot camp designed to facilitate the transition of individuals from diverse backgrounds into the tech field. I successfully completed the program, equipping myself with valuable skills and knowledge.

I am excited to join a mission-driven team, where I can contribute my analytical skills, technical aptitude, and passion for problem-solving. I am seeking a collaborative and friendly environment where I can continue to grow and make a meaningful impact.

## SKILLS

### Technical Skills:

- **Programming Languages:** JavaScript, TypeScript, HTML, CSS
- **Back End:** Node, Express, PostgreSQL, REST, Postman
- **Front End:** React, Next.js
- **Testing:** Jest, React Testing Library, Vitest, Playwright, Supertest
- **Design:** Figma, UI/UX Design, User Stories & Personas, Wireframing (Low & High Fidelity), Prototyping
- **Git and GitHub**
- **Advanced Excel** (Pivot Table, Name Manager, INDEX MATCH, SUMIF, VLOOKUP, Conditional Formatting, MACRO-Recording/debugging, graphs and tables, etc).
- **SAP, CRM, COGNOS, MERCURY(M3)**
- **JIRA**

### Soft Skills acquired from the experiences shared:

- Collaboration and Teamwork
- Problem-solving
- Adaptability & Learning Agility
- Communication
- Time Management
- Attention to Details
- Analytical Skills
- Empathy and positive attitude

## PROFESSIONAL EXPERIENCE

### Junior Full Stack Developer

**School of Code Bootcamp, remote, UK** | 09/2023 - 12/2023

- Attending the School of Code was a really transformative and rigorous journey, and the immersive learning environment allowed me to dive deep into coding concepts, work on real-world projects, and collaborate with talented individuals.
- The curriculum covered a wide range of programming languages and frameworks, and I was challenged to think critically, embrace iterative and agile software development, and improve problem-solving skills. Pair programming helped improve teamwork and communication.
- Testing was emphasized, including API testing, end-to-end testing, and unit testing.
- During our final project, lasting 4 weeks, our team developed a full stack app HABITAP, that will help people build habits and commit to them in a fun, social and accountable way, having an animated flower that represents the progress of the habit built. We used Next.js, Typescript, CSS, Lottie-react and Vercel for deployment. Also, for authentication and database, we used Supabase.
- Main Contributions to the project were starting to work with the authorization and authentication using Supabase, fetching data from the database and displaying it in the browser, making sure we have a connection with the front-end. Also, worked on implementing the logic of the scoring system, mainly coding when the plant will change in shape based on the score. Also, constant contribution in debugging and fixing errors.
- Our deployed app: <https://habitap.vercel.app/>
- Please see the [GitHub profile](#) for a detailed representation of all the projects whether is personal or in teams.

## EDUCATION

### **SoftUni Global**

JS Developer Online Course  
<https://softuni.org/>  
06/2022 – 12/2022

### **Academy of Economic Studies of Moldova**

Master's Degree in Corporate Finance  
09/2014 – 06/2016

### **Academy of Economic Studies of Moldova**

Bachelor's Degree in Finance and Banking  
209/2011 – 06/2014

## HOBBIES

- Languages: Romanian(native), Russian, English, French
- Passion for photography
- Passion for painting by numbers
- Avid reader of parenting books

*References can be provided on request*

### **Sales & Marketing Analyst**

**ESAB Group (UK) Limited, Upshire, UK** | 10/2018 – 12/2020

- Responsible for ensuring accurate data reporting, generating revenue reports and forecasts, EMEA reports, tracking sales performance, assisting in budget calculations, monitoring low-margin customers, conducting market analysis, maintaining CRM systems, providing business intelligence using a wide variety of tools and systems such as CAESAR-CRM, COGNOS, MERCURY(M3), HYBRIS.
- I was involved in testing and supporting a successful migration of data from company's old ERP system and 3rd party partner systems to a more modern, unified equivalent.
- Also, involved in assisting the development, testing and implementation of the new pan-European customer web-ordering tool (SAP Hybris).

### **Reporting specialist (contrôleur de gestion)**

**VEO WORLDWIDE SERVICES, Moldova** | 10/2016 – 08/2018

- I used various applications, maintained databases, prepared reports using software like SAP, CRM, Cognos C10, and Excel, analyzed client activities producing daily, weekly, and monthly reports to determine performance indicators utilizing advanced Excel functions like Pivot Tables, Name Manager, INDEX MATCH, SUMIF, VLOOKUP, Conditional Formatting, MACRO Recording/Debugging, and creating graphs and tables. These responsibilities encompassed data analysis, report generation, and providing support for operational decision-making within the organization.

### **Specialist in settlement accounts**

**Mobiasbanca – Group Société Générale, Moldova** | 09/2015 – 08/2016

- I disbursed funds transferred from abroad, guided bank counsellors in creating accurate payment orders, initiated AML (Anti Money Laundering) procedures through the JIRA Application for large transfers, generated account statements for correspondent banks, and performed document archiving and other related activities.

### **Internship (audit + reception)**

**PricewaterhouseCoopers, Moldova** | 01/2014 – 09/2015

- I had responsibilities in both audit and reception. In audit, I drafted and edited customer balance letters, translated legal documents, verified accuracy of the financial statements, and confirmed client balances. In reception, I answered calls, maintained databases, managed filing systems, operated office equipment, and greeted visitors.
